

Lab 1 Worksheet

Question 1 (1pt)

Write down the command to create a new directory called “Lab1” on the Desktop of the virtual machine from the terminal.

```
mkdir ~/Desktop/Lab1
```

Question 2 (1pt)

Write down the command for copying a file called “File.txt” that is located at “/home/neuro/Documents” to the Desktop of the virtual machine.

```
cp ~/Documents/File.txt ~/Desktop
```

Question 3 (1pt)

Write down the command for copying a directory called “BrainImages” that is located at “/scratch/neuro/” to the “/home/neuro/Documents” folder of the virtual machine.

```
cp -r /scratch/neuro/BrainImages ~/Documents
```

Question 4 (7pt)

Draw a line to connect the description on the left column to corresponding command on the right column. (Note, not all commands on the right column are correct or have a matching description.)
