

# **Lab 1 Worksheet**

## **Question 1 (1pt)**

Write down the command to create a new directory called “Lab1” on the Desktop of the virtual machine from the terminal.

## **Question 2 (1pt)**

Write down the command for copying a file called “File.txt” that is located at “/home/neuro/Documents” to the Desktop of the virtual machine.

## **Question 3 (1pt)**

Write down the command for copying a directory called “BrainImages” that is located at “/scratch/neuro/” to the “/home/neuro/Documents” folder of the virtual machine.

## Question 4 (7pt)

Draw a line to connect the description on the left column to corresponding command on the right column. (Note, not all commands on the right column are correct or have a matching description.)

DESCRIPTION	COMMAND
Print path to current directory	cd /
List items in current directory	mv test.txt newtext.txt
Create new directory named dir	cat test.txt
Change directory to dir	cd ..
Go up one directory	mv dir
Output the contents of test.txt	ls
Rename file test.txt as newtext.txt	cp -r test.txt newtext.txt
	pwd
	cd dir
	mkdir dir
